Portfolio: <https://joseparra.dev/>

PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years building scalable Angular applications for fintech and enterprise platforms. Led major version upgrades, legacy architecture decisions, and reusable abstractions aligned with the design system, shipping critical features in complex financial products. Works cross-functionally with product, UX/UI, QA, and backend teams to turn business requirements into maintainable frontend code. Uses AI-assisted development workflows without compromising engineering judgment or code review standards.

EXPERIENCE

iConstruye

Software Engineer, Frontend Lead

Feb 2025 - Jun 2026

Led the frontend of an enterprise treasury platform: bank reconciliation, payroll, vendor payments, and financial KPIs used daily by corporate clients.

- Frontend Lead in a squad of 10+ (6-person tech team): mentored and code-reviewed 4 developers on the frontend, plus PR approval and cross-functional technical representation.
- Led migration from Angular 13 to 18 across 10+ enterprise modules, modernizing frontend architecture and reducing accumulated technical debt.
- Built 50+ reusable components and abstractions on top of Angular Material to align UI with the corporate Design System without forking the library.
- Designed a typed, reusable analytics layer with Google Tag Manager, ensuring consistent event tracking across multiple modules.
- Refactored legacy modules with Cursor and Claude, integrating MCP (PostgreSQL, Linear, Notion, Figma) and Angular Agent Skills; validated output in code review and optimized rendering in critical financial workflows.

Cuadra SPA

Frontend Developer

Jan 2023 - Feb 2025

Evolved the frontend of a fintech platform spanning treasury, bank reconciliation, financial dashboards, payroll, and document management, with growing technical ownership.

- Go-to frontend technical reference in later stages: architecture decisions, informal mentoring, and legacy module refactors in dashboards and bank reconciliation.
- Built Angular Material abstractions aligned with the Design System, adopted across 30+ components for forms, tables, and complex inputs.
- Collaborated on 50+ production releases through Bitbucket pipelines and CI/CD workflows, coordinating frontend deliveries with backend and QA.

Valuelist

Frontend Developer, Trainee to Junior

Apr 2022 - Nov 2022

WealthTech platform for financial advisors and family offices (investments, insurance, and wealth visualization).

- Progressed from trainee to junior, contributing to reusable components, i18n, and frontend refactors with exposure to complex financial domain logic.

Freelance Frontend Developer

Independent, Part-time

May 2022 - Jun 2023

- Frontend support on Angular and React projects: UI improvements, bug fixes, refactoring, and component reuse.

TECHNICAL SKILLS

Frontend: Angular (13-21), TypeScript, RxJS, Signals, NgRx, JavaScript, HTML5, SCSS, CSS3, Responsive Design, i18n, Reactive Forms

Architecture: Feature-Based Architecture, Shared/Core Modules, Repository Pattern, Feature Flags, State Management with RxJS, REST APIs, HttpClient

UI and Design Systems: Angular Material, Design Tokens, Chart.js

Engineering Practices: Code Review, Mentoring, Refactoring, Performance Optimization, Agile, Scrum

Testing: Vitest

AI and Productivity: Cursor, Claude Code (Subagents, Skills, Hooks), MCP, ADRs, Spec-Driven Development, Code Review Gates

Tools: Git, GitHub, Azure DevOps, Bitbucket, CI/CD, Jira, Linear, Figma, Google Tag Manager, npm, yarn, pnpm, ESLint, Prettier, Husky

Additional Stack: React, React Native, Expo

EDUCATION

Civil Engineer

Instituto Universitario Politécnico Santiago Mariño

Dec 2015 - Dec 2020

LANGUAGES

Spanish: Native

English: Elementary (A2) — technical reading; studying
