

# Jose Parra

Frontend Software Engineer · Angular

Colombia · Remote Friendly · [linkedin.com/in/ing-joseparra](https://www.linkedin.com/in/ing-joseparra) · [joseparra.dev](https://joseparra.dev)

---

Frontend Software Engineer with 4+ years building scalable Angular applications for fintech and enterprise platforms. Combines technical ownership, frontend architecture, and mentoring to ship critical features in complex financial products. Led major version upgrades, legacy architecture decisions, and reusable abstractions aligned with the design system. Works cross-functionally with product, UX/UI, QA, and backend teams to turn business requirements into maintainable frontend code. Uses AI-assisted development workflows to accelerate delivery without compromising engineering judgment or code review standards.

---

## EXPERIENCE

### iConstruye

Jan 2025 — Jun 2026

Software Engineer · Frontend Lead

Led the frontend of an enterprise treasury platform: bank reconciliation, payroll, vendor payments, and financial KPIs used daily by corporate clients.

- Frontend Lead for the squad: mentoring, code reviews, PR approval, and technical representation in cross-functional decisions with Product, UX/UI, QA, and backend.
- Led migration from Angular 13 to 18, modernizing frontend architecture and reducing accumulated technical debt in a mature enterprise product.
- Built reusable abstractions on top of Angular Material to align UI with the corporate Design System without forking the library, preserving visual consistency and delivery speed.
- Designed a typed, reusable analytics layer with Google Tag Manager, ensuring consistent event tracking across multiple modules.
- Stabilized and refactored tightly coupled legacy modules with Cursor and Claude, connecting product, design, and data context via MCP (PostgreSQL, Linear, Notion, Figma) and official Angular Agent Skills; validated output in code review and prioritized rendering optimizations in critical financial workflows.

## SKILLS

### FRONTEND

Angular (13–21), TypeScript, RxJS, JavaScript, HTML5, SCSS, CSS3

### ARCHITECTURE & PATTERNS

Feature-Based Architecture, Shared/Core Modules, Repository Pattern, Feature Flags, State Management with RxJS

### UI & DESIGN SYSTEMS

Angular Material, Design Tokens, Responsive Design, i18n, Chart.js

### ENGINEERING PRACTICES

Code Review, Mentoring, Refactoring, Performance Optimization, Agile/Scrum

### AI & PRODUCTIVITY

Cursor, Claude, MCP, Angular Agent Skills, Speckit

### TOOLS

Azure DevOps, Bitbucket, Jira, Linear, Figma, Google Tag Manager, npm, ESLint

---

### ADDITIONAL STACK

React · React Native · Expo

## Cuadra SPA

Jan 2023 — Feb 2025

### Frontend Developer

Contributed to a fintech platform spanning treasury, bank reconciliation, financial dashboards, payroll, and document management, progressively taking on greater technical ownership on the frontend.

- Became the go-to frontend technical reference in later product stages, supporting architecture decisions, informal mentoring, and legacy module refactors in dashboards and bank reconciliation.
- Built an internal component system and UI abstractions for forms, tables, and complex inputs, reused across multiple product areas.
- Owned frontend releases to staging and production through structured Bitbucket workflows, coordinating with backend and QA.

---

## Valuelist

Apr 2022 — Nov 2022

### Frontend Developer · Trainee → Junior

WealthTech platform for financial advisors and family offices (investments, insurance, and wealth visualization).

- Progressed from trainee to junior, contributing to reusable components, i18n, and frontend refactors with exposure to complex financial domain logic.

---

## Freelance Frontend Developer

May 2022 — Jun 2023

### Independent · Part-time

- Frontend support on Angular and React projects: UI improvements, bug fixes, refactoring, and component reuse.

---

## EDUCATION

### Civil Engineer

Instituto Universitario Politécnico Santiago Mariño

Dec 2015 — Dec 2020

## LANGUAGES

Spanish Native

English Elementary (A2)
